HEXFET® Power MOSFET

- Isolated Package
- High Voltage Isolation= 2.5KVRMS (5)
- Sink to Lead Creepage Dist.= 4.8mm
- P-Channel
- Dynamic dv/dt Rating
- Low Thermal Resistance
- Lead-Free

Third Generation HEXFETs from International Rectifier provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The TO-220 Fullpak eliminates the need for additional insulating hardware in commercial-industrial applications. The moulding compound used provides a high isolation capability and a low thermal resistance between the tab and external heatsink. This isolation is equivalent to using a 100 micron mica barrier with standard TO-220 product. The Fullpak is mounted to a heatsink using a single clip or by a single screw fixing.

#### Absolute Maximum Ratings

	Parameter	Max.	Units
